**HODL** 

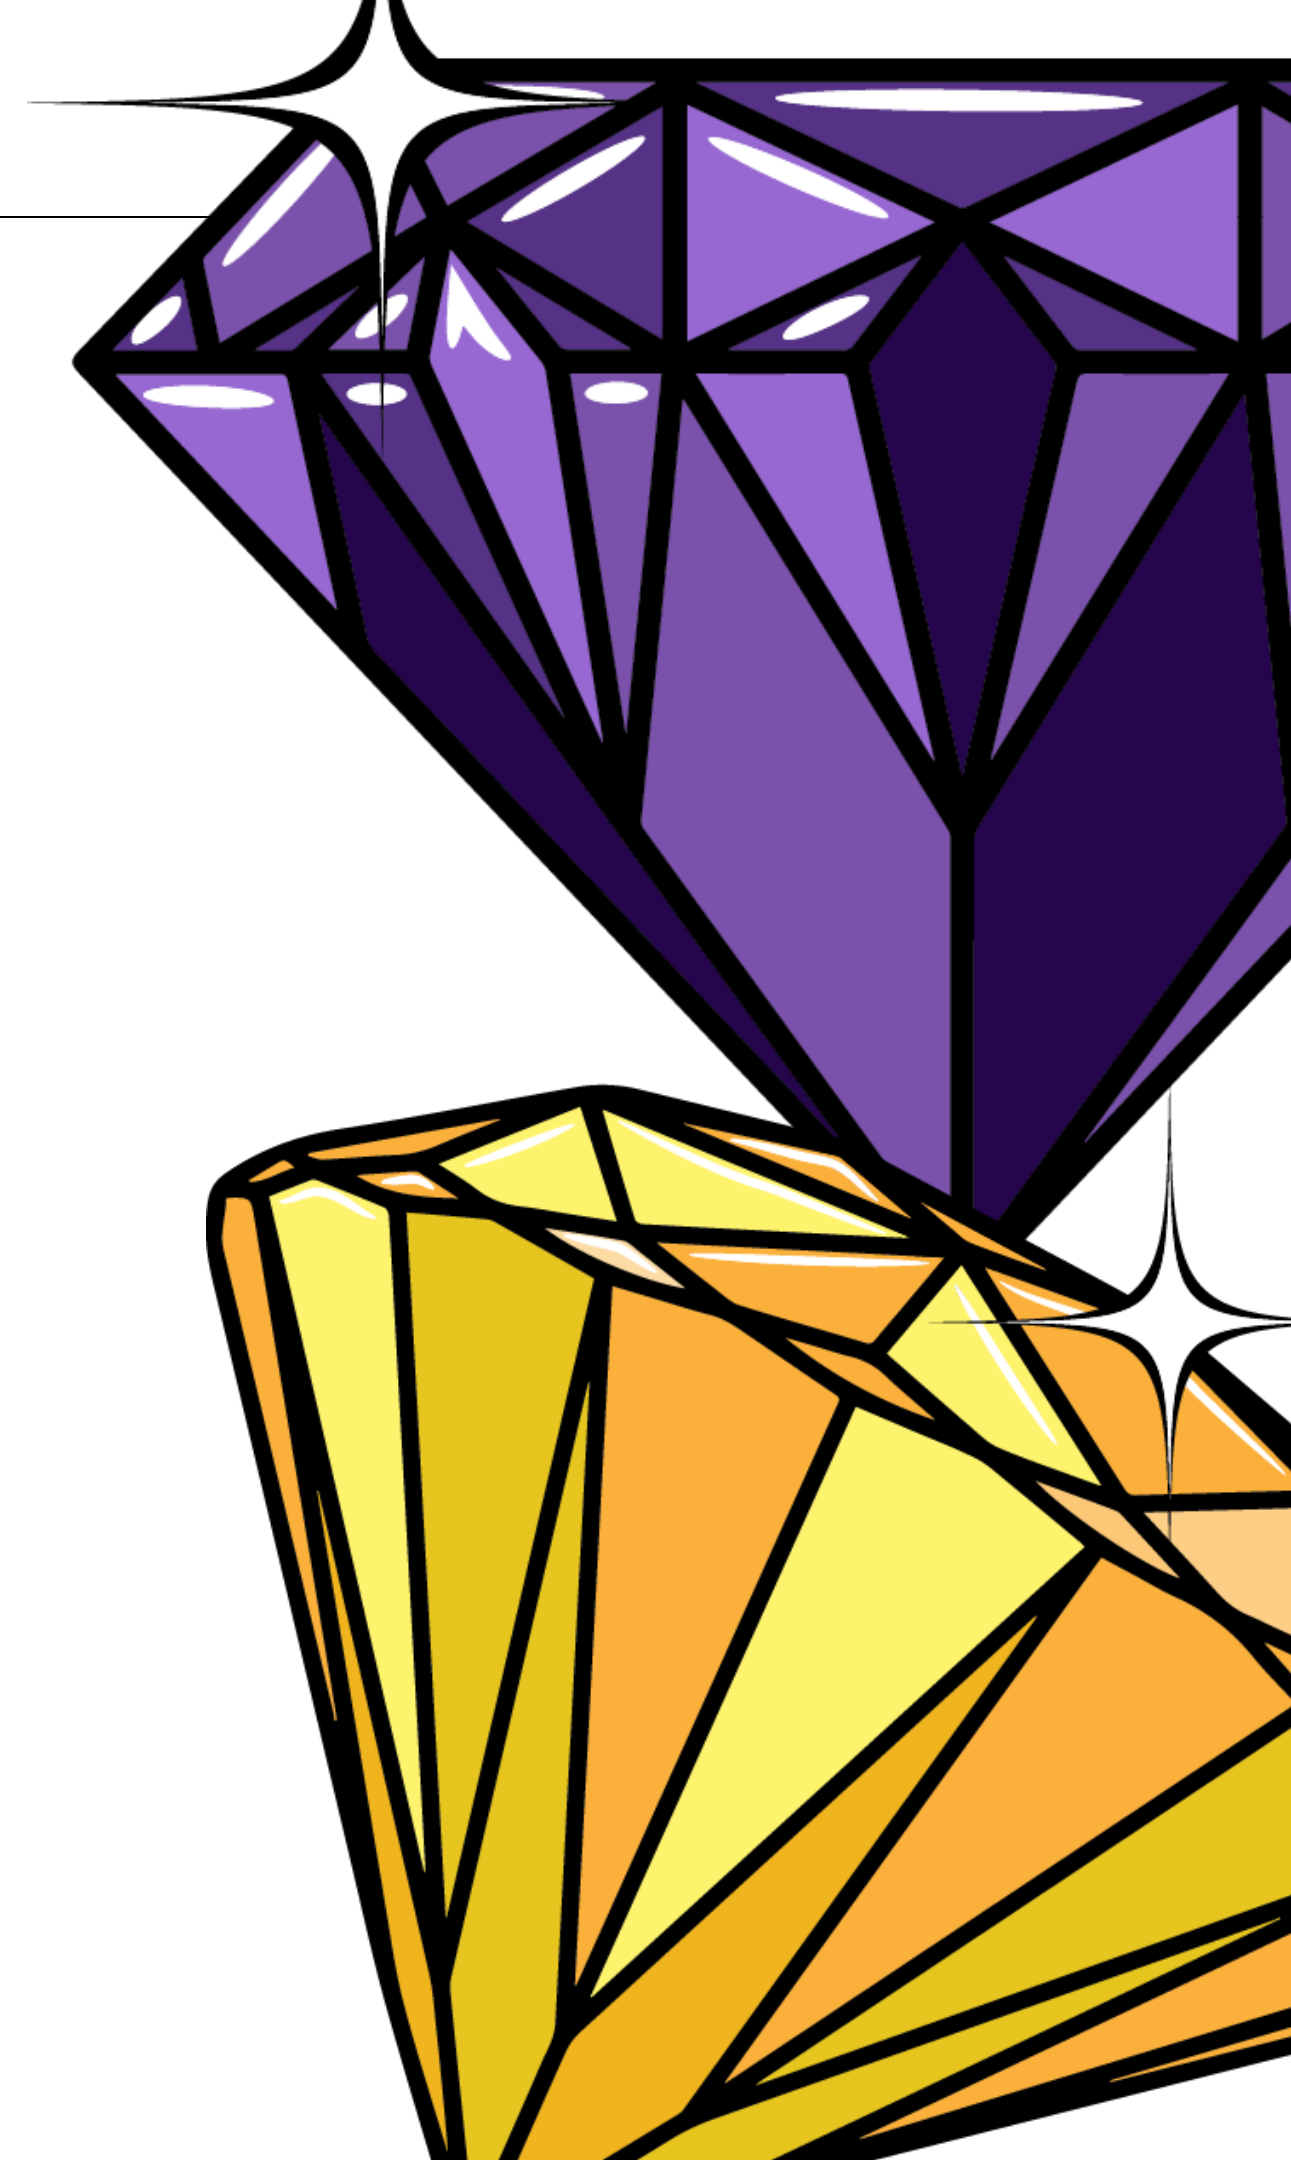

# The Genius of HODL

ORIGINALLY LAUNCHED BY FAIR LAUNCH CALLS, HODL IS A UNIQUE TOKEN FULLY COMMITTED TO FINANCIALLY REWARDING THOSE WITH DIAMOND HANDS.

THE TEAM HAS ALREADY PURCHASED AND BURNED OVER \$500,000 USD AGAINST THE SUPPLY, AUTOMATICALLY GIVING THE TOKENS REAL WORLD VALUE PEGGED IN ETHEREUM.

AS YOU LEARN ABOUT OUR DWINDLING SUPPLY, INCREDIBLE REWARDS AND INNOVATIVE PRODUCT ROADMAP, YOU WILL SEE THE BEAUTY OF INVESTING IN HODL.

REMEMBER, DIAMONDS ARE FOREVER.

**05** ————— All The Other Details

## Holder Rewards

**20%** of every transaction is given back to the holders. That means you will earn coins for doing nothing - creating an "auto-staking" system that puts money in your wallet.

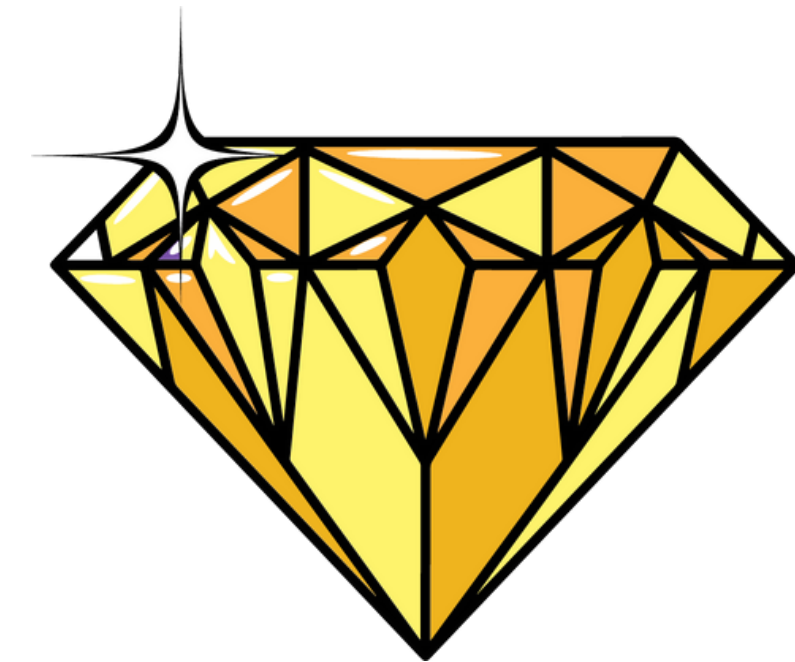

All you have to is HODL!

## Insane Burn

This token started with a 40% burn + \$500,000 USD bought back and also burned. There is over 90.5% of supply in a black hole wallet.

Every transaction will send an amount of coins equal to the 'reward' tokens gained by the burn wallet to the black hole.

## Supply Squeeze

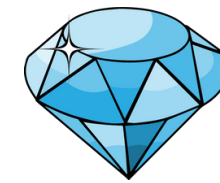

Due to the dwindling supply and ongoing burn, the amount of tokens is limited and will rise in price faster than the world has ever seen. When this happens, it is going to break the chart.

# Branding the **Diamond** of Defi

## Secured Value

It's one thing to call yourself a diamond. It's another thing to burn half \$1,000,000 USD to create one. HODL went with option B.

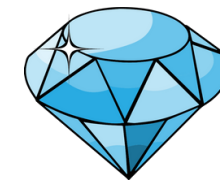

## World Famous Name

The token name is based on the crypto meme that everyone knows. This not only makes the token instantly recognizable, it also makes it constantly talked about.

## Market White Space

DeFi is full of coins that have no value and go from peak to valley in days, or even hours. This fresh token is unique since it's backed by real \$ with auto-staked rewards. It's not a gamble like most of the others.

## Product Opportunity

Our platform is a new born baby, with potential for growth and innovation every step of the way. Some of our plans are on the next slides, but where this goes is up to the imagination of the community and world.

# The **HODL** Memeplace

The team is working on a interactive platform that will introduce and grow our HODL NFT collection and brand to the world:

- Allow anyone in the world to submit a "crypto meme" (ex: Wen Moon, HODL, Ape In, etc)
- Anyone can view live submissions in our gallery and then we have daily vote on top designs on HODL TG & Twitter
- The winner (who can also share their social info) is awarded a \$50 Gift Card of their choosing
- HODL team mints top 3 voted memes into Official HODL NFT Collection assets
- All HODL wallets are automatically entered to win the NFTs - every 50 billion tokens owned count for 1 entry

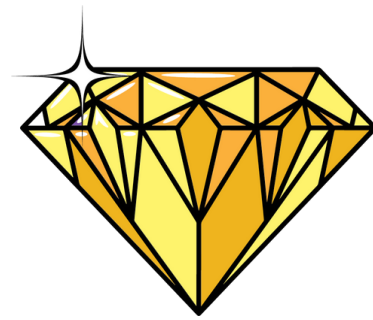

# Pressure Makes Diamonds

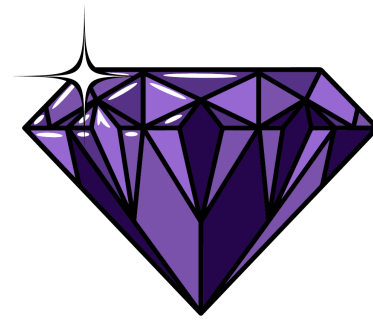

## RENOUNCED OWNERSHIP

Contract has been locked and renounced and is viewable in [Etherscan](#)

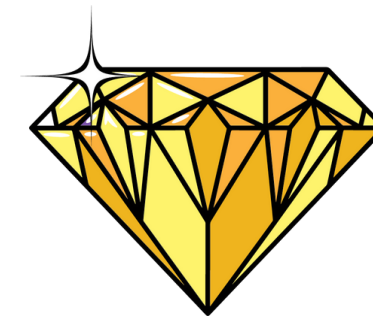

## LOCKED LIQUIDITY

Over \$600,000 has been locked for 101 years. If you outlive the lock, you win.  
[View on Unicrypt](#)

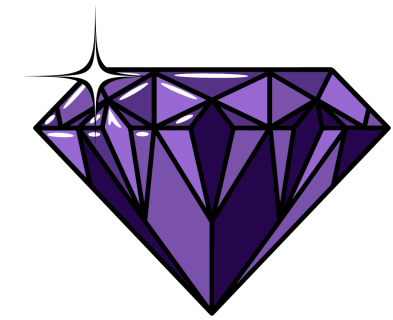

## VALUE SECURED

As we mentioned \$500,000+ has been burned against these tokens, so unlike most Uniswap tokens, there's real value in place

## BALANCED HOLDERS

The HODL'r roster is a thing of beauty with no wallet owning more than 1% of tokens. It's essentially dump and whale proof.

## COMMUNITY OWNED

This was originally a FLC project and will continue to be led by a democratic community, which is growing everyday.
